Successful transformation becoming visible/chg. in est & PT

2015 was marked by the restructuring of the B2C online broker business incl. Aktionärsbank and the consolidation of the acquired XCOM/biw bank. Having reaped low hanging fruits in 2015, FinTech Group was able to significantly turn around its business (both B2B and B2C) and to streamline its operations boosting **EBITDA** (incl. interest income) to \notin 20m (eH&A '15). Equipped with the innovative XCOM/biw unit, biw Bank should be able to significantly increase its interest income while further cost streamlining should allow to increase EBITDA to \notin 37.5m in 2016E.

The FinTech Group is an innovative financial technology company offering its knowhow and products to B2C and B2B customers. Backbone in its B2C unit is **flatex**, which is a leading German online retail broker that has started to disrupt the market in 2006. 150k retail customers value the offering for its competitive and convenient product. In the newly formed B2B segment, FinTech can bank on **XCOM** which is a leading provider of software and technology solutions for 250 institutions. Its BaFin regulated subsidiary **biw Bank** offers a wide range of white label banking solutions to the market.

For 2016E, we expect sales to grow by 18% yoy to € 95m driven by:

- Increasing marketing efforts and launch of a 'mobile first' solution for flatex to increase transactions. In 2015E, we forecast customer growth of 7% yoy to more than 150k while the customer base is seen to grow by > 10% in 2016E.
- Putting parts of the more than € 1bn of cash deposits (eH&A € 300-400m) at biw at work (e.g. technology based lending, special financing etc.) should allow generating an interest margin of up to 4% p.a. in the mid-term.
- XCOM's innovative firepower should allow to launch new product solutions (e.g. mobile payment system kesh) both for new and existing customers as well as for the entire FinTech Group including flatex.

The sound sales growth should translate into an increase in EBITDA of € 37.5m in 2016E fuelled by economies of scale and further cost savings.

Based on the sound growth prospects and positive restructuring effects, our PT is not affected by the **cut in sales/EPS estimates which are largely explained by intercompany sales adjustments and PPA related amortisation**. Moreover, we normalise the hurdle rate to 7.5% after the successful transformation is becoming visible. **BUY with a new PT of € 27 (old € 21) based on FCFY 2016E.** *continued...*

Company description:

FinTech is a German-based financial technology company and a leader in the German brokerage market.

The German-based Fintech Group is an innovative financial technology company offering its know-how and products to B2C and B2B customers. Being in a major transformation process, the new management team is turning the group upside down forming two powerful business units (B2C and B2B) which are structured as follows:

Source: Company data

• B2C unit (60% of total 2016E sales):

 flatex: The backbone of FinTech Group is flatex which is a German based online broker. In 2006, flatex has started to disrupt the German online broker market by introducing a fixed flat fee of € 5.90 per transaction for its customers.

Today, flatex holds a leading position in the German online broker market (# 2 in terms of trades and #3 in terms of customers). Its more than 150k retail customers value the company for its lean and simple pricing model. Typically, flatex serves highly active traders which especially value the cheap flat trading fee reflected in c. 6m (eH&A) trades in 2015 with an average amount of 40 trades per customer per year. In our view, active traders (c. 70% of the customer base) should do 60-70 trades p.a.

Serving exactly the needs of its niche customer group, **flatex** got rewarded by the German consumer testing magazine **'Stiftung Warentest' to be the first choice** for all who trade regularly.

To further monetise its well perceived and valued brand flatex, FinTech aims to **increase and optimise its marketing spending** which are currently c. \in 2-3m mainly spent online (e.g. google). Increasing this to \in 3-4m, in our view, should accelerate new customer growth to 15-20k p.a. which compares to historical levels of c. 10k p.a.

Furthermore, the introduction of a 'mobile first' solution should additionally attract customers and should allow to **increase the avg. number of trades** per customer from currently 40 p.a. by c. 10% yoy (eH&A) to 45-50 p.a.

Moreover, **new innovative product offerings** (e.g. ZinsPilot, debit cards) should increase the attractiveness for new and existing customers and hence increase customer loyalty and

most important the "share of consumer wallet", in our view. As this is seen to come at limited costs, it should become value accretive in the near future.

Being mainly active in Germany (eH&A 95% of customer base) and Austria, a more active geographical expansion into the Austrian and Swiss market is seen to attract new customers of the German-speaking region. Even more, in our view, flatex's fixed fee pricing model could be rolled out into and quickly adopted by new markets in Europe.

Overall, we assume these measures to increase revenues to \notin 20.8m with an incremental EBITDA contribution of c. \notin 2m to an EBITDA of \notin 12m in 2016E.

 ViTrade: The ViTrade GmbH provides special offers to the niche group of heavy retail traders. The platform offers its customer base to trade a wide range of products like shares, CFDs, futures, SFDs, ETFs and ETCs. The platform also allows for algorythem based trading strategies. ViTrade's trading system is provided by FinTechs biw bank guaranteeing a smooth and highly reliable order processing.

We assume stable revenues of c. \in 4.5m contributing \in 2m to group 2016E EBITDA.

New products like the mobile payment system kesh show the innovative firepower of the company. Kesh is a mobile payment system for the point of sale (POS), online and P2P payments. Moreover, it provides users to withdraw money at an ATM or in a retail store with a smartphone. While still in the pilot phase, the system serves already 8.500 retail customers and 150 merchants. Already one DAX company is a customer and a another large DAX company is interested in becoming a cooperation partner. During the pilot phase, the transaction volume amounted to > € 1m in 2015, according to FinTech Group.

Furthermore, kesh is offered as a white label solution to the market. In our view, a clear competitive advantage is the BaFin licensed payment solution that can bank on biw Bank in the backend for clearing. This provides a potential partner with a highly competitive, fast responding and external data secure mobile payment system.

As the system is still in an early stage, we have not reflected any EBITDA contribution in our estimates.

Aktionaersbank: Before the acquisition of XCOM/biw bank in March 2015, FinTech applied for an own German banking license and set up Aktionaersbank at the end of 2013. The full service bank started operations by mid 2014, however is substantially burdened profitability of the group (€ 8m loss in 2015).

As the bank is offering a similar product portfolio compared to flatex and biw, Aktionaersbank became strategically irrelevant for FinTech and hence is **up for sale**. In our view, biw bank will act as the sole BaFin regulated German banking licensed backbone of the FinTech Group.

For 2015E, we assume Aktionaersbank to generate a loss of € 8m which will not be reflected in the P&L as the bank is disclosed as discontinued operations (IFRS). We expect the

disposal of the Aktionaersbank to take place in Q1 for a price of around \in 10m (eH&A). However, this is not yet reflected in our estimates.

Additionally, the deal should free up \in 14m of regulatory capital, improve annual earnings and pool banking activities which should also release management capacity.

 B2B unit (40% of total 2016E sales): This unit compromises the latest acquisition XCOM Group which was purchased in March 2015.
XCOM equipped the group with a leading software and technology platform in the field of innovative banking and financial service solutions with more than 250 institutional clients. The XCOM group operates four business lines: trading, e-banking, payment, banking.

On top of that, the XCOM subsidiary **biw Bank** is a German BaFin licensed bank offering a wide range of white label banking services to institutions managing $> \in 5$ bn AuM and \in 1bn customer cash deposits (deriving mainly from flatex). biw is the settlement bank for flatex's customer deposit/cash accounts as well as partner of choice for other major financial institutions (e.g. IKB, pbb direkt, etc.).

Source: Company data

 We expect XCOM's technology and software capabilities to be the perfect innovation engine for the development of new fintech business lines under the roof of the group. Already today, XCOM is the technology provider for e.g. trading systems for financial institutions like Deutsche Bank, Commerzbank, HypoVereinsbank and Postbank.

In our view, the **largest source of sales and EBITDA growth potential is based on the more than € 1bn cash deposit** biw has via flatex clients.

For 2016E, FinTech plans to make better use of this source by building up a **technology-based lending business** such as P2P lending, payroll lending and consumer finance.

FinTech aims to generate an annual interest margin of up to 4% on parts of the \in 1bn cash deposits (eH&A \in 300-400m).

As the credit book is just starting to be built up, average interest margin for 2016E is expected to be at a lower interest margin level (eH&A 2% p.a.), while it should increase towards 4% p.a. once the credit book is fully set up.

Thanks to the latest capital increase of FinTech to strengthen the equity base of biw Bank ($2015E \in 35m$) the potential loan book could be 12x the amount of equity. This would currently allow biw to operate a **max. loan book of c.** \in 400m. At an **average margin of 2% p.a., this would yield c.** \in 8m of additional EBITDA every year (included in our estimates).

 Strategic partnerships: In June 2015, FinTech entered a long-term agreement (until 2022) to outsource its CFD business (CefDex) to Commerzbank.

As part of the deal, Commerzbank took over the entire CFD order flow execution (as market maker) in Q4 2015. This is largely stemming from FinTech's own B2C online broker flatex. The deal makes Commerzbank the leading B2B CFD trading operator in Germany. In return, FinTech received c. € 10m (eH&A) upfront and is seen to receive 40% of profits p.a. until the termination of the agreement in 2022. Then the flow will fall back to FinTech. During the run-rate of the agreement, the company should hence continue to benefit from increasing CFD trading volumes in Germany through the profit sharing agreement.

Moreover, the wind-down of CefDex reduces operating costs, frees up regulatory capital and reduces the overall risk exposure of the group.

Overall, the deal should **contribute a mid single digit million amount to the bottom-line of the FinTech Group.**

Action: Following the significant repositioning of the company that resulted in the long-term agreement with Commerzbank for the CefDex business and showing the Aktionaersbank now as discontinued operations, we lower our sales expectations. This results in a total reduction of our sales estimates of up to 33% in 2017E.

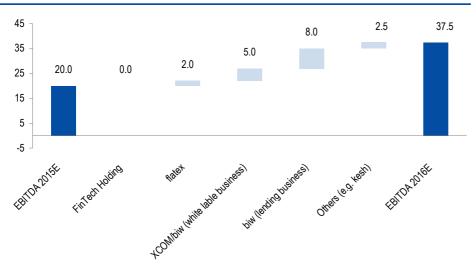

2015E EBIT benefits from the payment of \in 10m from Commerzbank stemming from the long-term agreement for CefDex. The re-classification of c. \in 8m net interest income from XCOM/biw which is now recognised above the EBITDA positively contributes to group EBITDA. This is partially compensated for by higher than initially expected PPA related amortisation. As a result, our EBIT estimates are increased by 6% in 2016E.

Higher PPA amortisation and somewhat higher than initially expected minorities for the former XCOM/biw owners of \in 1m and \in 2m in 2015E, 2016E and 2017E respectively, result in the reduction of up to 24% in our EPS forecasts.

As reduced EPS estimates mainly reflect higher PPA related amortisation, the normalisation of the hurdle rate to 7.5% (previously 8.5%) after the successful transformation is becoming visible, explains the increase in our PT to \in 27.00 (old \in 21.00).

While restructuring measures should have materialised in significantly improved 2015E results (due to be reported in May 2016), the outlook for profitable growth looks promising. Operating a much more streamlined business model and facing ample growth opportunities along with internal business synergies, we confirm our BUY rating with a new PT of € 27 (previously € 21) based on FCFY 2016E.

Disclosures regarding research publications of Hauck & Aufhäuser Privatbankiers KGaA pursuant to section 34b of the German Securities Trading Act (WpHG) and the regulations of the German Financial Analysis Ordinance (FinAnV)

Pursuant to section 34b of the German Securities Trading Act (WpHG) and section 5 of the Financial Analysis Ordinance (FinAnV) a research report has to point out possible conflicts of interest in connection with the analysed company. A conflict of interest is presumed to exist in particular if Hauck & Aufhäuser Privatbankiers KGaA

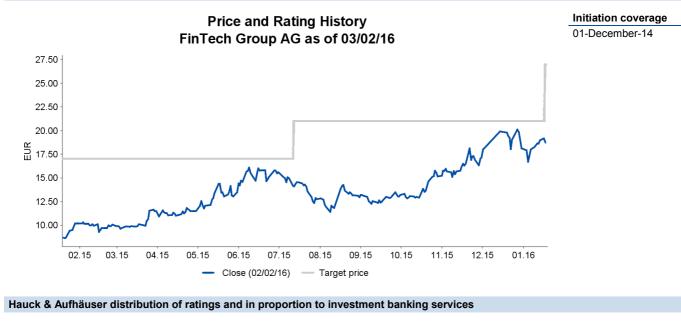

(1) or its affiliate(s) was, within the past twelve months, a member in a consortium that acquired the financial instruments of the analysed company,

- (2) has entered into an agreement on the production of the research report with the analysed company,
- (3) or its affiliate(s) has, within the past twelve months, been party to an agreement on the provision of investment banking services with the analysed company or have received services or a promise of services under the term of such an agreement,
- or its affiliate(s) holds 5% or more of the share capital of the analysed company,
- (5) or its affiliate(s) regularly holds a trading position in shares of the analysed company or derivatives thereof,
- (6) or its affiliate(s) manages the financial instruments of the analysed company on the basis of an existing contractual relationship,
- (7) or the analyst has any other significant financial interests relating to the analysed company such as, for example, exercising mandates in the interest of the analysed company.
- (8) The research report has been made available to the company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

Company	Disclosure
FinTech Group AG	3, 5, 8

Historical target price and rating changes for FinTech Group AG in the last 12 months

Buy	60.80 %	100.00 %
Sell	7.20 %	0.00 %
Hold	32.00 %	0.00 %

1. General Information/Liabilities

This research report has been produced for the information purposes of institutional investors only, and is not in any way a recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by Hauck & Aufhäuser Privatbankiers KGaA, exclusively to selected recipients [in DE, GB, FR, CH, US, Scandinavia, and Benelux or, in individual cases, also in other countries]. A distribution to private investors in the sense of the German Securities Trading Act (WpHG) is excluded. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of Hauck & Aufhäuser Privatbankiers KGaA. Reproduction of this document, in whole or in part, is not permitted without prior permission Hauck & Aufhäuser Privatbankiers KGaA. All rights reserved.

Under no circumstances shall Hauck & Aufhäuser Privatbankiers KGaA, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities

This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently.

The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organisational Requirements

Hauck & Aufhäuser Privatbankiers KGaA took internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of Hauck & Aufhäuser Privatbankiers KGaA involved in the preparation of the research report are subject to internal compliance regulations.

No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis.

4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the resultant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjustment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

Hauck & Aufhäuser Privatbankiers KGaA uses the following three-step rating system for the analysed companies:

Buy: Sustainable upside potential of more than 10% within 12 months

Sell: Sustainable downside potential of more than 10% within 12 months.

Hold: Upside/downside potential is limited. No immediate catalyst visible.

NB: The ratings of Hauck & Aufhäuser Privatbankiers KGaA are not based on a performance that is expected to be "relative" to the market.

The decision on the choice of the financial instruments analysed in this document was solely made by Hauck & Aufhäuser Privatbankiers KGaA. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of Hauck & Aufhäuser Privatbankiers KGaA whether and when it publishes an update to this research report.

5. Major Sources of Information

Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. Hauck & Aufhäuser Privatbankiers KGaA has checked the information for plausibility but not for accuracy or completeness.

6. Competent Supervisory Authority

Hauck & Aufhäuser Privatbankiers KGaA are under supervision of the BaFin – German Federal Financial Supervisory Authority

Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 – 28, 60439 Frankfurt a.M.

7. Specific Comments for Recipients Outside of Germany

This research report is subject to the law of the Federal Republic of Germany. The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state.

This document is only being distributed to and is only directed at (i) persons who are outside the United Kingdom or (ii) to investment professionals falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (iii) high net worth entities, and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order. This document shall not be made available - whether directly or indirectly - to another group of people in or from the United Kingdom.
